

BUS 301: Corporate Finance

Fall 2026 · Sections 011 and 012

Instructor and Contact

Professor Daniel Osei-Bonsu, CFA. Office TRS 2-118. Email dosei@example.edu, and please put “BUS301” in the subject line or the filter will bury it. I hold office hours Wednesdays from 15:00 to 17:00 and I am generally around for twenty minutes after each lecture.

Course Description

This course develops the analytical tools of corporate financial management: time value of money, capital budgeting, cost of capital, capital structure, and working capital management. The course is case-based. You should expect to spend six to eight hours per week outside of class preparing cases, and you should expect to be cold-called.

Course Materials

There are three things you need to buy for this course, and I want to be direct about the cost because it is not trivial and I would rather you plan for it now than be surprised in October.

First, the textbook. We use *Corporate Finance: Core Principles and Applications*. The bookstore stocks the current edition at \$210.00, but the previous edition is nearly identical for our purposes and can usually be found used for around \$145.00. Either is acceptable. I will post a page-number concordance in week one so you are not disadvantaged by using the older printing.

Second, the case pack. Cases are licensed individually and cannot be photocopied or shared. The pack for this term contains eleven cases and costs \$89.00. It must be purchased through the course portal by September 18, 2026 — the licensing window closes after that date and I cannot reopen it.

Third, the simulation. In the second half of the term we run a six-week capital structure simulation. The licence is billed in US dollars at US\$45.00 per student, which at current exchange is roughly CAD \$62. You will be prompted to purchase it in the week of October 5, 2026. If the exchange rate moves the Canadian figure will move with it.

Finally, a note on the optional CFA Level I preparation guide that some students ask about. It is \$55.00 at the bookstore. It is genuinely optional, it is not examinable, and you should not buy it unless you are already planning to sit the exam.

A financial calculator is required for examinations. The BA II Plus is about \$40.00 new, and the Students' Union runs a used-calculator exchange in the first week where they typically go for \$15.00 to \$20.00.

Evaluation

Your grade is composed of case write-ups (20%), a midterm examination (25%), a group valuation project (25%), and a final examination (30%). There is no participation grade, but cold-call performance informs borderline cases.

The **midterm examination** will be held on **Thursday, October 22, 2026**, from 18:00 to 20:00 in TRS 1-067. It covers everything through capital budgeting.

The **group valuation project** is due **Friday, November 27, 2026** at 23:59 through the portal. Groups of four. I assign the groups; do not ask to change them.

The **final examination** is scheduled by the Registrar for **Tuesday, December 15, 2026**. It is cumulative and three hours long.

Case write-ups are due at the beginning of the lecture in which the case is discussed. There are eleven cases; your best eight write-ups count.

Administrative Dates

Classes begin September 8 and end December 7. Reading week is October 12 to 16. The last day to drop this course with a full refund is September 21; a 50% refund is available until October 2; after October 16 no refund is issued. The last day to drop without academic penalty is November 10.
